

TORRENS

GEOLOGICAL SURVEY OF SOUTH AUSTRALIA
DEPARTMENT OF MINES ADELAIDE

S.A. GEOLOGICAL ATLAS SERIES SHEET H 53-16 ZONE 5

FIRST EDITION 1964

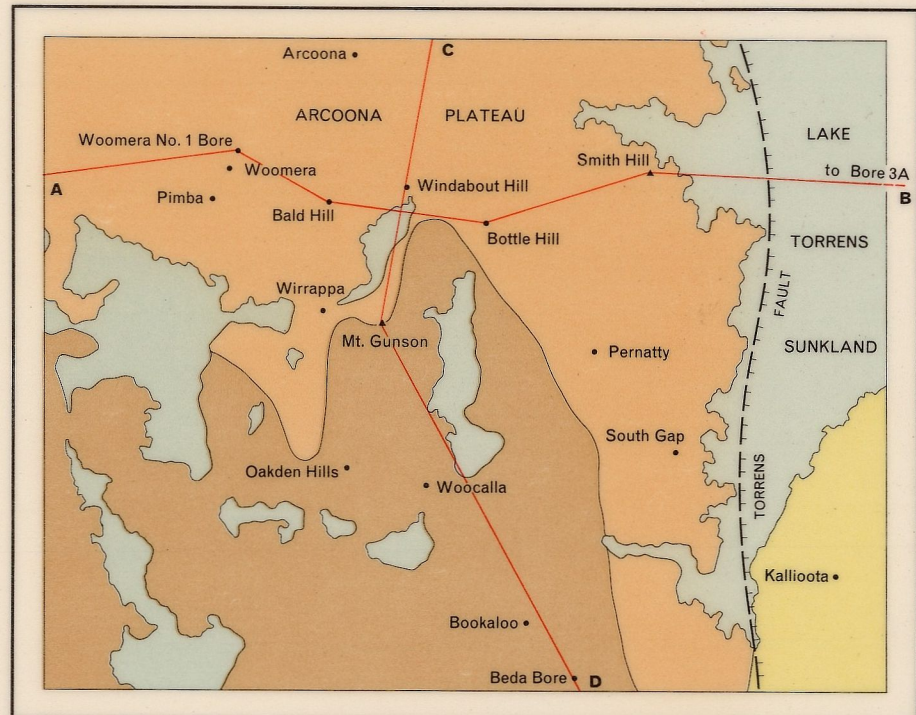

REFERENCE

QUATERNARY	Qra	Lakes, Lake Deposits: Salt, gypsum, gypseous clays, silts and quartz sands.
	Qrs	Alluvium, gravels and silts of major drainage channels; outwash flood plain deposits.
	Qs	Sand plains: Sand dunes with claypans.
TERTIARY	To	Stream deposits: Boulder beds, ferruginous grits and sands (Mungapic Creek).
	Ts	Lake and stream deposits: Silicified conglomerates, grits and sandstone with fossil leaf impressions. Ductile remnant undifferentiated.
CENOZOIC	LAKE TORRENS SUNKLAND (Section only)	Dolomitic mudstones, brecciated dolomites.
	Carbonaceous sandstone, siltstones, mudstones.	
MESOZOIC	Kr	White kaolinitic siltstones with "erratic" rounded boulders; gravels and grits (worked in Tertiary in part): Roma Formation Equivalents.
	Archean limestone (Section only).	
PALAEOZOIC	Archean limestone (Section only).	
	Archean limestone (Section only).	
UPPER PROTEROZOIC	Archean limestone (Section only).	
	Archean limestone (Section only).	
ARCHEAN SYSTEM	Archean limestone (Section only).	
	Archean limestone (Section only).	
STURRIAN MARINON	Archean limestone (Section only).	
	Archean limestone (Section only).	
AGE UNCERTAIN	Archean limestone (Section only).	
	Archean limestone (Section only).	
VOLCANIC LAVAS (?) (Section only).		
IRONSTONE: Massive limonite, haematite, ferruginous gravels.		

GEOLOGICAL BOUNDARIES

Geology by R. K. JOHNS, M.Sc.,
M. N. HERN, B.Sc., L. G. MOON, B.Sc.,
B.A. HERN, B.Sc., L. G. MOON, B.Sc.,
Map preparation by Cartographic Section,
Department of Mines, S.A.
Compiled under the direction of
L. W. PEARCE, M.Sc., Deputy Government Geologist,
T. A. BARNES, M.Sc., Government Geologist,
Director of Mines
Based under the authority of the Honorable
Sir A. Lyell McEwen, M.L.C., Minister of Mines.
Published 1964

Copies of this map may be obtained from the Geological Survey
of South Australia, Department of Mines, Adelaide, or the Bureau
of Mineral Resources, Geology and Geophysics, Canberra,
A.C.T. Printed for the Geological Survey of South Australia as a
contribution to the Geological Map Series of the Commonwealth.
