

ROOPENA

GEOLOGICAL SURVEY OF SOUTH AUSTRALIA
DEPARTMENT OF MINES ADELAIDE

REFERENCE

QUATERNARY	Qrs	Gypsum dune deposits
	Qra	Solonised siliceous sand and sand dunes
	Qra	"Mallee Soil" plains—solonised brown soils, often capped with travertine Limestone Alluvium
TERTIARY	T	Lateritic Gravel, siliceous "cement," grit and sandstone
PALAEOZOIC	Pc	Lincoln Gap. Flagstones: Floggy sandstones, shaly sandstone and interbedded shales
	Pc	Tregalga Shales: Laminated sandy and floggy shales
	Pc	Corunna Conglomerate: Conglomerate, grit, sandstone—and interbedded shale, and shaly sandstone
PROTEROZOIC	P	Moanbrie Grit: Dense felspathic grit, coarse and fine sandstone and silty quartzite
MIDDLE PRE-CAMBRIAN OF ARCHAIC AGE	A	Upper Middleback Quartzite: Banded hematite quartzite and interbedded schists
	A	Cook's Gap Schists: Foliated grits and pebble schists, phyllites with cherty and dolomitic bands
	A	Lower Middleback Quartzite: Banded hematite quartzite and interbedded schists
MIDDLE PRE-CAMBRIAN OF ARCHAIC AGE	A	Middleback North Dolomite: Cherty dolomitic marble
	A	Gneissic Complex: Sedimentary schists, quartzite, phyllite, migmatite, laccolitic gneiss, granitic gneiss and gneissic granite

IGNEOUS ROCKS

	Younger Dolerite dykes and possibly doleritic basalt sill or flow
	Felspar Porphyry—Gawler Range and Moanbrie porphyries
	Tor Granites—Gneissic granite masses in the Gneissic Complex
	Older Dolerite—dolerite—gabbro—amphibolite, sills, dykes and plugs

REEF AND ORE DEPOSITS

Qrs	Quartz Reefs
	Iron Ore

TECTONIC SKETCH

Geology by K. R. MILES, D.Sc. F.G.S. Senior Geologist
R. K. JOHNS, B.Sc. A. SOLOMON, B.Sc. Assistant Geologists
R. C. SPRING, M.Sc., Geologist in charge of regional map preparation
Base map and cartography by Geological Drafting Section, Dept. Mines, S.A.
Compiled under the direction of S. B. DICKINSON, M.Sc., Government Geologist
Issued under the Authority of the Honourable A. LYELL McEWIN, M.L.C., Minister of Mines
Published 1952
